SUMMARY

Full Stack Developer with hands-on MEAN stack project experience (Angular, Node.js, Express.js, MongoDB) and 1+ year of professional software engineering experience at Infosys, developing enterprise application enhancements and coordinating release delivery. Built and deployed a production-style e-commerce application with JWT authentication, payment integration, and cloud database/hosting infrastructure. Seeking Full Stack Developer roles focused on MEAN/MERN technologies.

TECHNICAL SKILLS

Frontend: Angular, React.js, TypeScript, JavaScript, HTML5, CSS3

Backend: Node.js, Express.js

Database: MongoDB (Atlas), MySQL

APIs & Auth: REST APIs, JWT, Role-Based Access Control

Tools & Practices: Git, GitHub, VS Code,Postman, Agile, SDLC

Other: Python (NumPy, Pandas)

PROJECTS

E-Commerce Bookstore | MEAN Stack

Live: ink-quill-nu.vercel.app

Repo: github.com/SRIVASTAVA-V8/Ink-Quill

- Built Ink & Quill, a full-stack e-commerce bookstore with a modular monolithic architecture, using Angular, Node.js, Express.js, MongoDB, and Tailwind CSS.
- Implemented JWT authentication, role-based authorization, and protected customer/admin APIs, with guest and authenticated cart/wishlist management.
- Built a multi-step checkout with Razorpay (test mode) integration, server-side payment verification, and transaction-safe order processing.
- Implemented inventory management with stock validation, automated stock deduction, and low-stock alerts.
- Built an admin dashboard for user, inventory, order, and shipping management, with full order lifecycle tracking (processing → shipped → delivered).
- Deployed on Vercel (frontend) and Render (backend) with MongoDB Atlas and production-ready environment/session configuration.

Portfolio Website | React.js

Live: portfolio-website-pearl-eta-85.vercel.app

Repo: github.com/SRIVASTAVA-V8/PortfolioWebsite-

- Developed a responsive single-page portfolio in React.js with a downloadable resume and project demo/repo links.

Book Recommender System | Python

Repo: github.com/SRIVASTAVA-V8/Book-Recommender-System

- Built an item-based collaborative filtering recommendation system using NumPy and Pandas.

EXPERIENCE

Systems Engineer *Aug 2025 – Present*

Infosys Ltd.

- Developed three modules for an enterprise application's new release, built on one shared query-parameter-driven API.
- Analyzed requirements and implemented new features and logic changes within an existing enterprise codebase.
- Collaborated with cross-functional teams on release planning and coordination for the upcoming release.

Systems Engineer Intern *Feb 2025 – Jun 2025*

Infosys Ltd.

- Built a role-based Project Management System using the MEAN Stack (MongoDB, Express.js, Angular, Node.js) with REST APIs, task-subtask management, and interactive Angular dashboards.
- Developed an Internal Communications Hub with an admin portal, audit logging, and a GrapeJS email builder.
- Implemented JWT authentication, role-based access control, and bulk CSV/XLSX recipient uploads.

EDUCATION

DIT University, Dehradun

- B.Tech – Computer Science & Engineering, 8.68 CGPA (2025)

Certifications: Machine Learning (Stanford – Coursera), Python for Data Science (IBM – Coursera)
